

# TriDef<sup>®</sup> DVD Player

## View any DVD in Stereo 3D

### A New Dimension in Movie Viewing

Put your 3D display to work in a new way: watching Hollywood movies!

For over 10 years, DDD has produced the highest quality, most stunning 2D to 3D conversion of content. Our process has been used by Hollywood studios, large advertising agencies, and multinational corporations to bring “an extra dimension” to their consumer and commercial content. Our new breakthrough uses the same principles to display normal 2D video content in 3D in real time.

The effect creates astonishing depth into the screen with a limited off-screen effect (dramatic off-screen effects require specific post-processing and animation).

### Pricing (USA)
